

Enex 100

**Enex 100**  
Glass Wall Mural

Next time you happen to be strolling down "the terrace", we're excited to inform you that you can now see our work that has recently been installed to the lobby of the Enex100 building at 100 St Georges Terrace in Perth.

The installation is an impressive glass mural approximately 12 metres wide x 4 metres high. We created an abstracted interpretive montage based upon the history of the site and heritage images painstakingly sourced from the Battye Library collection.

The mural utilises a specialty glass product called DigiGlass, which is produced in Melbourne and each individual panel then shipped back to Perth.
